Koala Sewing Cabinet Australian Sewing Station Model KCSTOW7C

I bought this from a fellow Khaki Quilter a few years ago and have happily used it ever since. But now I am moving to a smaller home and will not have the space to keep it set up and open. It has the mechanism to lower your machine to a flat top position when used with personally purchased Sew Steady insert (specific to your machine). Provides lots of organizational spaces and a fold up table space behind the machine!
Please call or text me to take a look or see the dimensions.
